

How confident you are with your 'verified' patient samples in Asia?

We have conducted a self-sponsored survey to gauge the willingness of patients to share info that will help confirm their credibility, diagnosis and treatment for patient research.

Identification Card

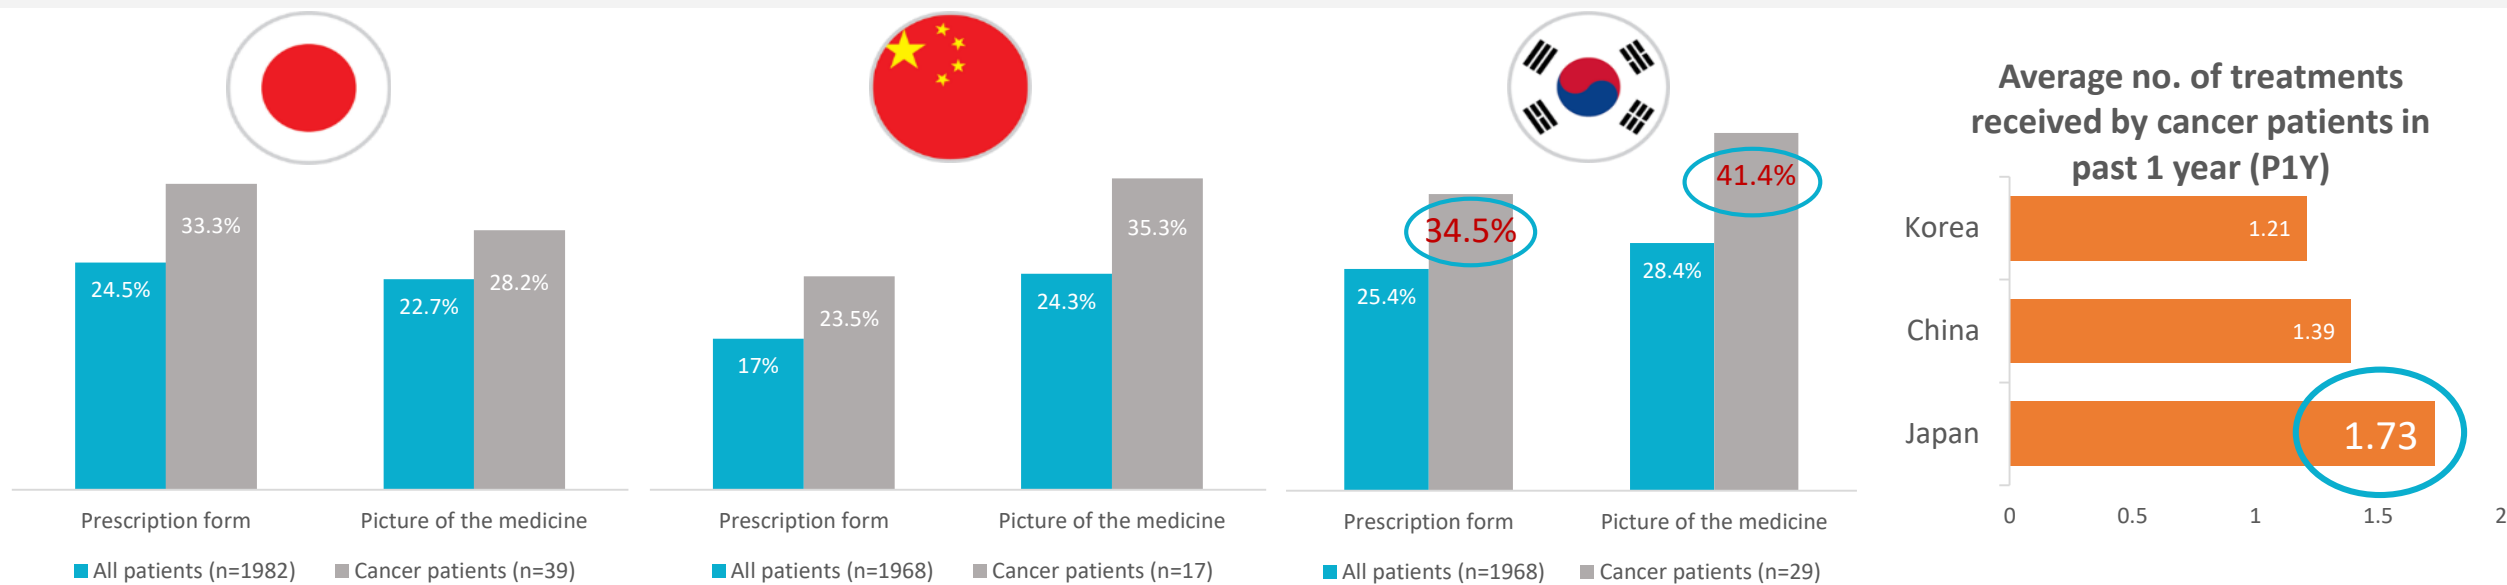

Prescription Form

Picture of Medicine

The willingness to upload supporting evidence among cancer patients is significantly higher and highest in Korea. However, cancer patients in JP are receiving more treatments than cancer patients in other countries.

Projected number of patients you can reach

	JP	CN	KR		JP	CN	KR
Those who are willing to upload prescription form				Those who are willing to upload picture of medicine			
All patients	95,660	152,929	27,726	All patients	88,632	141,693	25,689
Cancer patients	4,095	2,772	702	Cancer patients	3,475	2,352	596

Where do they come from?

Japan

- Hokkaido (n=98)
- Tohoku (n=121)
- Kanto (n=717)
- Chubu (n=325)
- Kinki (n=391)
- Chugoku (n=107)
- Shikoku (n=47)
- Kyushu/Okinawa (n=176)

China

- North China (n=385)
- Northeast (n=116)
- East China (n=787)
- Central (n=171)
- South China (n=281)
- Southwest (n=176)
- Northwest (n=52)

Korea

- Gyeongsang (n=466)
- Jeolla (n=130)
- Chungcheong (n=182)
- Gangwon (n=38)
- Jeju (n=16)
- Seoul/Gyeonggi (n=1146)

Various type of patients within reach
